Teens, Social Media & Technology 2018

According to recent data from a new Pew Research Center survey, YouTube, Instagram and Snapchat are the most popular online social platforms among teens. Prior to this, Facebook held that position. 85% of teens report using YouTube, 72% use Instagram, 69% use Snapchat while only 51% of teens report that they use Facebook. With 95% of teens owning a smartphone, the ease of mobile connection usage leads to more persistent online activities. 45% of teens now say they are online on a near-constant basis.

Teens have a mixed view on social media's effect on their lives. 40% say it has a positive impact on them by helping them to keep in touch and interact with others, communicate with family and friends and connect with new people. 27% of the teens feel that social media has a mostly negative effect on people their age saying that it has led to increased bullying and the overall spread of rumors, it distorts reality and gives teens an unrealistic view of other people's lives, adds to peer pressure and can lead to psychological issues and drama. Other teens surveyed feel that social media has neither a positive nor negative effect.

Televisions first went on sale in the late 1920's. J.L. Baird first displayed television that had only 30 lines and gave coarse image. Currently the digital signal of television sends pictures with 1080 lines.

Although the technology was developed earlier, color television sets didn't become widespread until the 1970's.

The 1980's saw the arrival of remote controls.

By the time the American child reaches 14, on an average they have seen around 11,000 murders on television.

Broadcasting companies use commercials and subscriptions to earn revenue and pay for the costs of production.

The television advertisement first broadcast on July 1, 1941 in New York. The advertisement was for Bulova Watch for 20 seconds. It was aired before a game of baseball played between the Philadelphia Phillies and the Brooklyn Dodgers. The cost air buy during that time was only \$9.

In 2008, the cost of 30 seconds advertisement was \$2.7 million in the Super Bowl broadcast. It is the world's most costly airtime.

Early monitors used cathode ray tubes (CRT) but have since been replaced by thinner screens that use liquid crystal display (LCD) and plasma.

Similar to radio, television broadcasts are transmitted as specific frequencies.

Sony began selling VCRs in 1970 that was capable of recording television shows. However, Sony was sued by film studios for copyright piracy. Later on, the Supreme Court backed Sony.

Queen Elizabeth II launched her own YouTube channel after fifty years with her first Christmas address to the public of the UK.

The most watched TV broadcasts are typically global events such as the Olympics and the Football World Cup.

The <u>Late Show</u> of Ireland which started in 1962 and <u>The Tonight Show</u> which started in 1954 are the longest running talk show in the world.
