

# Connect to a Wi-Fi network in Windows 10

Applies to: Windows 10

Whether you're at home, work, or out and about, chances are you'll find a Wi-Fi network that you can connect to for Internet access.

1. Select the **Network** icon on the taskbar. The icon that appears depends on your current connection state. If you don't see one of the network icons (or a similar one) shown in the following image, select the **Up arrow** to see if it appears there.

2. Choose the Wi-Fi network you want, then select **Connect**.
3. Type the network password, and then select **Next**.
4. Choose **Yes** or **No**, depending on the type of network you're connecting to and if you want your PC to be discoverable by other PCs and devices on the network.
