

My Vision For The Future Moody Manatees

As a parent of two wonderful children and one of them being a manatee moody student, My 3 top priorities is education, safety and support. Choosing teachers, staff, and parents, that are willing to help make this goal possible. Supporting our children, teachers and school play such an important part in their life and our choices and voice makes that impact to better our education system for them. My goal is to make sure everyone is heard and that everyone feels like their voices are heard and that the seed they plant for their children blooms. As a Mexican-American mother, multicultural bond is a must, when our children or other children see us participate in events is creates a domino effect of inspiration for others. Leading other kids to talk to their parent about their school activities and getting more parent involved. Sometimes the major dilemma wall for most parents is communication within languages, that where I come in, to hear you and communicate any ideas and or concerns that you all have, but most importantly you as the parents are the important key to our children's education. Your support, your ideas, your voice matters most in this journey. And it is my job for all of you to walk with me and expand learning opportunities for our children. My goal for 2024 is to have you the parents join me in all the events possible and make sure your needs of time frames are met. Speaking one language or 2 goes a longs way and you to will learn in the process, because as "A Team That Works Together, Prospers Together". Together we will help support our children and students. Your presences alone helps makes a difference to teachers and staff. My over goal is to have students excited to come to school and for them to feel safe and cared for because they are the future. So please vote for me and together as a team we will make a difference to provide the best of education for our students.

Sincerely, Alicia Robles-Diego
